## P5: Type Checker

---

Guikai Huang (ghuang49@wisc.edu)

For this assignment I write a type checker for Gibberish programs represented as abstract-syntax trees. The main task is to write *typeCheck()* methods for the nodes of the *ast.java*. In addition I also:

1. Modified P5.java.
2. Wrote two test inputs: `typeErrors.gibberish` and `test.gibberish` to test the new code.

## Build and Test

---

```
# build
make
# test
make test
```
